About This Game

Dodge Diego is a side-scrolling adventure jump and run where you play Diego, a young man on a mission. You will follow Diego on his journey through a jungle full of enemies and other dangers. Skeletons and scary monsters will try to stop you, but you will prove that you truly are the toughest of the jungle, *or will you?*

The soundtrack composed by Eric Skiff will motivate you to improve your highscore over and over again.
How far can you go?

This game was better than expected. A few bugs here and there, but the developer updates the game often, so I think most will be ironed out.. THAT ♥♥♥♥ING GAME DOESNT WORK BECAUSE THAT ♥♥♥♥ING NVIDIA♥♥♥♥♥♥THAT I INSTALLED 50 TIMES ALREADY DIDNT. Well, before I tell you what Undead Overlord is, let us first cover the basics of what it is not. It's not finished for one thing. A second key point that is worth mentioning is that it is not a game with femiliar gameplay. Both these 2 things are being said not in a negitive sense, not at all. They are just worth being noted before i go into what the game is.

Undead Overlord, I saw this awhile back on Kickstarter. The concept of being the zombie-leader-commander was a very good hook, and still is. The game never made it to being fully funded. But now its been out for early access, which is cool. Gameplay is unique a bit clunky on a few things, but taking into account the game isn't finished yet should put some minds at ease for the time being. The game plays like a RTS but most of the time I feel like i'm always starting out with a infantry-flood tactic, which I suppose is to be expected (because you're zombies). All things considered, the game does show alot of promise, weather it can get rolling is up to funding and a whole lot of drive to see this through to the end.. Vindictive Drive is a very decent game, but quite frustrating at times. There are no validations that you got all the items you need for the next mission so you have to do all the things again just to buy the items you forgot to buy in the first place. I spent the last mission having almost no bullets so I have to mix and match everytime I die.

Anyway, I like the premise of the game. The artwork is okay-ish, but I believe some will not like it. It is a very dark game with dark humor. If you are easily triggered regarding suicide issues and whatnot, you may get dismayed by this game. Game is not yet finished as it is still on early access. Wish this game could pull through as it looks promising, to say the least.

Not recommending YET because it is an early access game. But hey, it costs $3, which is not bad.. Devs are a bunch of♥♥♥♥♥hats. Game had so much potential, but they leave us with a turd sandwich that we have to pay for to take a bite of an realize it's crap. On top of that it's dead.. I'm editing this review, as I have noticed some rage inducing problems. Sound glitch on long scenario's, causing complete loss of engine sounds. Impementation of token system via radio is very clunky and doesn't seem to make any logical sense. Route signage, I presume is accurate, however extremely annoying with speed limit signs going from 30 to 40, then immediately to 5 without any warning. Bad for me as I like to drive without any HUD, but it's probably my fault for not learning the route off by heart xD Some speed signs have advanced warning, some do not. Apart from all that, this is my new favorite route and I would highly reccomend it. Landscaping\/scenary of the route is absolutely breathtaking.

Sick cheevos, free and easy. Voice acting was pretty good and game is pretty cute. The Cat Machine is incredibly fun, having the time of my life.

It's a puzzle game reminiscent of SpaceChem, in that you must build paths for certain objects to traverse in just the right way. But in The Cat Machine the thing you're guiding is a train... of cats.

The mechanics are simple and intuitive, and the graphics, music & text are hilarious. I can't get enough of these cat trains, and the scientist cats programming up a storm in the background.

In detail, you have a train of cats where each cat is a different color. You have to make the train go across tracks of the same color as the cats, in the same order. To make matters more complicated, the same set of tracks you designed has to work for several different cat trains.

Often it feels like designing a finite automaton to accept a given set of strings. At a complexity level the game is clearly in NP, and moreover it is straightforward to encode planar Hamilton path in it, so it's NP-complete. (I.e. guaranteed challenge!)

Level design is very good too; brute forcing will not work, you must notice regularities & patterns in the cat trains you're going to have to guide and devise some high-level plan first.

Highly recommended.. real \u2665\u2665\u2665\u2665ing good, best DLC to date by far IMO.. A Great game.
Wanna play online with other players? owo

http://steamcommunity.com/groups/Frontlines_Fuel_Of_War. Assumed from the trailers this would be a new campaign, it is not. You can only play them in custom, one-off matches and multiplayer.

I thought this may be my own fault for not reading the description clearly enough - but all the description says is:

This DLC allows you to play as the Tau Empire fleet, featuring all-new ships, castes and gameplay mechanics, as well as the unique Warfare system.

No conditions (like can't play in campaign at all) are mentioned.

This feels extremely dishonest. I am requesting a refund as I have played less than 2 hours since installing the game and because I believe it to be falsely advertised.

Sankaku Renai: Love Triangle Trouble **SANKAKU RENAI: LOVE TRIANGLE TROUBLE RELEASED!**:
It's finally here!
Sankaku Renai: Love Triangle Trouble is finally out today! (*•̀ᴗ•́*)و ̑̑
